

Invasive Species Awareness Month

Bush Honeysuckle - WI DNR

June 2007

invasivespecies.wi.gov

isam_wi@yahoo.com

New This Year!!!!

**Woodland Field Days
Kids Art Contest**

Woodland Field Days will be held around the state to show the destruction invasive species can cause to Wisconsin's forests. These events will give landowners and land managers the tools they need to practice **early detection** and **rapid response**.

A state-wide Art Contest will be held involving 4th and 5th grades in learning about invasive species in forests through combining lessons in ecology with the visual arts.

There is more to Invasive Species Awareness Month! Please visit our website to find out how you can plan events in your neighborhood, or to see what's already scheduled.

Common Buckthorn in forest – WI DNR
